As of May 2019:

- 31 of 37 countries in the UNFPA Asia-Pacific region completed at least one violence against women (VAW) prevalence survey
- 8 countries have completed more than one national VAW prevalence survey with comparable methods
- 26 countries have national statistics on intimate partner violence
- 19 of these have data on all three forms of violence in the last 12 months for SDG indicator 5.2.1
- 11 countries have national statistics on sexual violence by non-partners
- 8 of these have data on sexual violence in the last 12 months for SDG indicator 5.2.2

WOMEN WHO EXPERIENCE INTIMATE PARTNER VIOLENCE, 2000 - 2019

UNFPA Asia and the Pacific Region
Goal 5: Achieve gender equality and empower all women and girls.

Target 5.2: Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking and all forms of exploitation.

Target 5.2.1: Proportion of ever-partnered women aged 15-49 years who experienced intimate partner violence.

The 2019 snapshot is the fourth annual edition of this publication. The countries listed in the tables are those in the Asia-Pacific Region where UNFPA is present/working.

The data in the map and table 2 reflect the most recent (if available national) data collected with either the EQ-ViP or the ICDS, with a focus on data from 15 to 49-year-old women. The data include data from updated report (year 2019). The map and tables will be periodically updated and expanded to cover more countries, more data in the latest report, for the most recent data, refer to the website below.

Sources of data:

UNHCR: UNHCR's multi-country study on women's health and domestic violence (2018).

aWHO: Country studies that have replicated or adapted the WHO methodology (2016).

aWHO/P4P: Adaptation of WHO methodology conducted for the Asia-Pacific region (2016).
